

I am an entrepreneur, farmer, mother and grandmother. Mountain View County is more than just my home – it's the legacy my family and I are building for future generations. My parents were hard working immigrants from Austria and my 3 sisters and I enjoyed growing up in Calgary. I met the love of my life, Ed, at Crescent Heights High School in Calgary. We married after graduation and Ed joined the City of Calgary Fire Department. Ed's career as a fire fighter was rewarding and demanding so we sought a quiet rural life and found it here.

In 1999 we uprooted our teenage children, relocating to Mountain View County, where we began the building of our legacy on a quarter section on Highway 791. We are proud of the hard working, wonderful adults our children have become. Our son is a pilot with West Jet Encore living in Calgary but spends his spare time at our farm here, tending his small herd of commercial cows and camping on our back 40, escaping city life for the tranquility of our community. Our daughter is a graduate of the Equine Breeding and Reproduction program at Olds College and together with her husband and kids, runs a successful cattle operation in Knee Hill County. We love every moment spent with our 5 grandkids and thoroughly enjoy supporting them in their various 4H events, sports activities and cattle shows.

Beyond taking care of my family, my professional background includes accounting, human resources, entrepreneurial enterprises and volunteer leadership. For many years, I had the honor of serving as Vice President of the Calgary Firefighter Hearts and Hands Association, which supports firefighters, their families and local community members impacted by fire. I volunteered with the World Police Firefighter Games in 1988 and was instrumental in bringing the Sporting Clay shooting events here to Mountain View County. As well, I volunteered for many years with spaniel sporting dog associations.

Recent proposed developments within Mountain View County have made me delve deeper into council and related matters. I believe Mountain View County residents deserve greater accountability and transparency and that this requires stronger communication between council and residents. If elected, I will serve as a conduit, taking your concerns to council and relaying their responses directly back to you. I will advocate for policies that support our farmers — the foundation of our culture and economy — and ensure that our agricultural heritage is protected for generations to come. I am not a career politician, but I am dedicated to my communities, whether that is the firefighters and their families, our children's schools and extra-curricular groups or this vibrant county of Mountain View.

I am very focused, highly organized and quite simply, I get things done. I would appreciate your support and if elected, I am dedicated to working for you and with you, to keep Mountain View County strong, sustainable, and rooted in the values that make Alberta great.
